

Hiya fellow nature lovers,

We are a lovely young couple looking to rent a rural, peaceful home in its own bubble with a garden to look after the wildlife 🦉 🍀

We absolutely love nature and our dream is to be surrounded by wildlife as we are passionate about protecting and taking care of the animals, plants and the land.

We are very clean, tidy, respectful and quiet. We also have a good income, good credit and great references.

Sadly nice rural rental properties are rare these days and competition is very high for them so it has not been easy to find our dream home. We also really need somewhere safe and peaceful so that we can buckle down and carry on working hard on our passion projects to help the future of humanity and Mother Earth

If you know of any potential places or anyone who might do then we would be so grateful for the support! Please contact us on 07532 676004. Thanks so much for reading, have a great day! 🧡💕🌈
